## About Me

Ability to work with Java,C,Sql.Can work well under pressure and make the best of any situation.Having very good interpersonal and communication skills. Passionate about implementing and launching new projects. Ability to translate business requirements into technical solutions. (Immediate joiner)

## Projects

### Smart Eco-Friendly Garbage management using IOT, 12 Weeks

- The main objective the project is to maintain the level of cleanliness in the city and form an environment which is better for living. By using this system we can constantly check the level of the garbage in the dustbins which are placed in various parts of the city.

### Women Safety Using Wrist Watch, 4 Weeks

- The purpose of this device is to safeguard women in the event they might face any danger. The device uses wireless sensor network to communicate and to send alerts to them. The GPS and GSM are used to share the user's location directly to the relevant authorities and saved contacts.

## Certifications

- **Introduction to Front End Development**
